Supply Chain Management | Production Planning and Control | Project Management

SUMMARY

Dynamic industrial engineer with extensive experience in manufacturing process optimization, digital transformation, and spare parts inventory management. Proven ability to lead and execute projects that improve operational efficiency, automate reporting systems, and enhance maintenance management through the implementation of CMMS and digital tools. Skilled in data analysis, project management, and cross-functional collaboration, with a strong record of delivering impactful solutions at PT Unilever Indonesia and through various industrial internships. Technical expertise includes Microsoft Excel (advanced), Power BI, Minitab, AutoCAD, Microsoft Visio, and supply chain management systems. Recognized for strong problem-solving skills, adaptability, and a commitment to continuous improvement in dynamic industrial environments.

EDUCATION

TRISAKTI UNIVERSITY

2018-2022

Industrial Engineering Study Program, GPA 3.54/4.00

UNIVERSITY OF INDONESIA

2021

Student Exchange Industrial Engineering Lean Operations, GPA 3.30/4.00

ACHIEVEMENTS

- **PATENTS (2022):** Copyright-Design and Development Canting Tool at Batik Kembang Mayang Studio Using Robotics Arm Dobot Magician
- **BEST ACHIEVEMENT FMS ROBOTICS LABORATORY ASSISTANT 2021**
Production System Laboratory of Trisakti University
- **2ND WINNER BUSINESS PLAN COMPETITION 2021**
Industrial Business Fair ke-14, POBIS Laboratory of Trisakti University
- **3RD WINNER TEAM KARYA TULIS ILMIAH CROSART 2021**
Student Presidency of Trisakti University
- **1ST WINNER OF PORTI CUP WOMEN'S BASKETBALL 2022**
Sports Department of HMTI USAKTI

WORK EXPERIENCES

PT. UNILEVER INDONESIA – Walls Ice Cream Factory

Feb 2024 – Des 2025

OTE Packing Hall UMS & Spare Part Inventory Projects (CNC) – Supply Chain; Engineering Department

- Led the digitalization of spare part inventory management (Vendor Managed Inventory & CMMS), achieving 99.44% inventory accuracy, optimized stock visibility, and ensured higher reliability for Engineering and Production teams.
- Reduced overall machine downtime by 17.30% through systematic spare part availability improvement, maintenance planning, and coordination with cross-functional teams.
- Implemented digital governance platforms (EEWO, SEWO, QEWO), increasing compliance and improving engineering reporting efficiency, resulting in 87.5% reduction in manual reporting time through automated dashboards and workflows.
- Accelerated maintenance responsiveness by developing and deploying the Computerized Maintenance Management System (CMMS) across Packing Hall, Utility, Mixing, and Building areas—leading to a 16% reduction in Mean Time to Repair (MTTR) after digitalization.
- Identified and delivered €372,177 in cost-saving breakdowns through optimized spare part lifecycle management, breakdown reduction initiatives, and process optimization.
- Enabled an additional €645,639 cost-saving potential from MTTR reduction through improved digital maintenance tracking and faster troubleshooting capability.
- Designed and automated power BI dashboards for spending monitoring, breakdown mapping, compliance tracking, and capex visibility, enabling faster decision-making across engineering teams.
- Enhanced spare part picking and retrieval process through digital system transformation, achieving 88.41% reduction in picking time, enabling faster maintenance response and improved technician productivity.
- Coordinated procurement activities for critical spare parts, ensuring >98% fulfillment rate and improved readiness for planned and unplanned maintenance.

- Authored and updated key operational documents (IK & SMP Level 4) and supported UMS PM Step 1 implementation across all production areas.
- Led the Mini Digibox (Fast-Moving Spare Part) project, accelerating part identification and reducing production downtime significantly.

PT. DUTA HITA JAYA

Okt 2021 - Dec 2021

Production Planning Control Internship

- Assisted in streamlining production planning processes by accurately calculating production requirements and schedules.
- Analyzed production data to identify bottlenecks and recommend process improvements, contributing to increased operational efficiency.
- Supported the development of actionable solutions to address production challenges, resulting in more effective resource allocation.
- Collaborated with cross-functional teams to ensure timely and efficient execution of production plans.

PT. PUPUK KUJANG CIKAMPEK

Jul 2021-Aug 2021

Maintenance Planning & Reliability Internship

- Analyzed and improved the maintenance system for machine C1110, resulting in more efficient preventive maintenance and reduced unplanned downtime.
- Developed a comprehensive analytical report with actionable strategies, directly supporting increased equipment reliability and overall productivity.

LABORATORY ASISSTANT EXPERIENCES

COMPUTER AIDED DESIGN LABORATORY, TRISAKTI UNIVERSITY

Coordinator of Research & Development Department 2020-2022

- Developed and enhanced practicum content for Engineering Drawing, Manufacturing Processes, and Manufacturing Industrial Design courses, benefiting over 90 students.
- Led research and practical application projects involving Dobot Magician, CNC Machine and provided upgraded materials and training for laboratory assistants.

Coordinator of PIM 1 CAD Laboratory 2020-2021

- Organized and coordinated practicum sessions with lecturers and a team of 16 assistants, ensuring smooth execution and high-quality learning experiences.
- Tutored and assessed 80+ students, supporting their mastery of CAD assignments and laboratory activities.

PHYSICS LABORATORY, TRISAKTI UNIVERSITY

Physics Laboratory Assistant 2021-2022

- Collaborated with lecturers and a team of 20+ laboratory assistants to organize and prepare practicum sessions for students in the Physics Laboratory.
- Contributed to the efficient operation of physics laboratory sessions by ensuring the availability and proper functioning of equipment.
- Provided tutoring and individual/small group assistance to students to aid their comprehension and completion of practicum assignments.
- Conducted assessments to evaluate the knowledge and skills of 80+ students related to laboratory activities.

ORGANIZATIONAL EXPERIENCES

HIMPUNAN MAHASISWA TEKNIK INDUSTRI OF TRISAKTI UNIVERSITY

Head of Licensing and Work Program Division, Sports Department (Ags 2021 – Ags 2022)

- Achieved enhanced efficiency in managing licensing and work programs, ensuring effective division goal fulfillment.
- Trained and supervised division staff to ensure optimal performance.
- Conducted systematic evaluations of division licensing progress, identifying areas for improvement.

TRAINING & CERTIFICATES - [CERTIFICATE LINK](#)

- **FUNDAMENTAL EXCEL COURSE 2023** – Coding Studio
- **CERTIFIED IN SUPPLY CHAIN ASSOCIATE 2021** - Logical Operation; ID Credential: 2021-C-006063
- **CERTIFIED TRAINING LOGISTICS OPERATIONS IN SUPPLY CHAIN 2021**-Latih; ID Credential: 25/129-KP/LATIH/IV-21
- **IMPLEMENTING SUPPLY CHAIN MANAGEMENT 2023** - LinkedIn Learning
- **SUPPLY CHAIN AND OPERATIONS MANAGEMENT TIPS 2023** - LinkedIn Learning

- **CERTIFIED TRAINING LEAN MANAGEMENT PRACTICES 2022** - Latih; ID Credential: 15/072-KP/LATIH/I-22
- **CERTIFIED TRAINING FAILURE MODE & EFFECTS ANALYSIS 2021**-Kaweroo Institute; ID Credential: B-2962/2021-CA

ADDITIONAL

- **Languages:** Indonesian (Native) and English (TOEFL Score 573 - [Certificate TOEFL](#)).
- **Soft Skills:** Leadership, teamwork, collaborative, time management, data analysis, problem solving, critical thinking, and detail oriented.
- **Software Skills:** Microsoft Excel, Minitab, Power BI, AutoCAD, Microsoft Visio, Microsoft Word, Microsoft Power Point
